Reasons for Allowance

1. The following is an Examiner statement of reasons for allowance:

The prior art of record, individually or combined, did not specifically disclose or suggest the combination of scheduling processing of data received at a plurality of ports, where the scheduling includes both selecting one of the plurality of processing threads that is available to process the first segment of data and awaiting notification by the processing thread that processing of the first segment of data has been completed prior to unblocking the port and reassigning the port to one of the plurality of processing threads, in a system scheduling network packet data received at a plurality of ports for processing performed by a plurality of threads executing in parallel, as set forth in the presented claims. This novelty and non-obviousness determination is interpreted in light of the supporting sections of the specification, including Figure 11, and Page 29, Line 16 through Page 30, Line 20.

In regard to the previously asserted double patenting rejections, Applicant's arguments are persuasive in regard to the non-commonality of the presently claimed invention having the inclusion for awaiting notifications by the processing thread that processing of the first segment of network data has been completed prior to unblocking the port. This subject matter, in combination with the remainder of the claims, has not been located in the claimed subject matter of any of the cited patents or applications.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
